

G520 series

Air Sterilizer

GERMITROL®
AIRResearch
Improve Your Quality of Life

Be prepared for Pandemic Flu Outbreak!

G520 for high capacity coverage in large areas, even useful in open areas

Another Innovative Product by the maker of the Patented Germitrol Air Sterilizers

- Design from the maker of the well-known Germitrol Patented UVC System to kill Airborne Germs.
- Laboratory test have shown Germitrol products can achieve a kill of 99% on bacteria and fungi.
- Tested to be safe from UV leakage.
- Added features: TiO₂ Photocatalytic Filter and Anion generator.
- Helps to control odour, and other gaseous compound.
- Area coverage of approximately up to 2300 sq.ft.
- Germitrol products are used by asthmatic patients, hospitals, clinics, laboratories, childcare centres, offices, homes, food industries, etc.
- An ideal product to reduce the germ load content in any house, building or any rooms. NEA's Guidelines Appendix E: Table 3 stipulates both Total Bacteria and Fungi Count to be less than 500cfu/m³ each.
